

TESTIMONIALS

from our Clients

These annual health screenings have been life changing for me. Prior to completing my annual screenings with ISWM, I had not been to see a physician in years. After I reviewed my first health screening report, I noticed that some of my lab results that were outside the normal range. I decided that I needed to do something about it and made an appointment with a physician to review them. Now I see my physician every year to review my screening results, and have been able to get those abnormal results back in the normal range through modifying my lifestyle. I just feel so much healthier.

My physician and I were looking over my ISWM laboratory results. My doc noticed an upward trend in my PSA results. It wasn't yet abnormal, but my doc was concerned about the trend. It turns out I had prostate cancer, but because of my years of ISWM results, my doc was able to diagnose and treat my condition early. The yearly ISWM screenings were literally a life saver for me.
